That is why most of the magazines are just a lot of blank pages. Write the date, write some thoughts, thoughts, But, what happens if you also want to track exercise, diet, health statistics or other daily objectives? The obvious solution is to keep the general newspaper separate from its tracker or daily verification list. However, if you want to write notes along with your health data, do you enter the notes on the tracker or your diary, or both? This template is the first to try to combine the general writing of the magazine with the monitoring of daily health. I have included some columns to trace common things such as weight, but you can customize the cycling sheet to monitor other things. Tax me if you have some great ideas about how to use this template. How to use the newspaper of the newspaper to begin, following these steps: Read the sample inputs and this full page select the sample data and press Enter a date on the column date Enter the text in the input column â ¡el rest depends on you! But, there are some tips and other things that could help. Will update this with more information if I receive other questions. The tickets of your newspaper can be whenever you want them to be, because the conditional format only creates edges when you enter a new date. There are no films on this sheet, except for the formulas used in the conditional format rules to add edges when you enter a new date. The humor column uses a drop -down list of data validation that can be customized on the configuration work sheet. See my article using unicode characters in Excel. For a data centered on the data, use the filter in the column date to hide all the rows where the date column is blank. You can create graphics of your data, but that will require more knowledge of Excel. Insert new rows by right clicking on a row number and selecting insert. rojem rojem ut arutpaC .lecxE ne lanoicidnoc otamrof le rasu a rednerpa abed euq elbisop se ,acoviuqe es otamrof le iS .¡Âranoicnuf on otamrof le ,oirartnoc ol eD .oiraid led roirefni etrap al omoc adacram ¡Âtse euq alif al erbos salif saveun etresni ♪♪ ♪♪ ♪♪
